All Sage cheques incorporate our Advanced Security Measures® (ASM®), a combination of security features designed to help protect your cheques against fraudulent use.

Check out a few of the enhanced security features!

1. Fluorescent fibres: Visible only under UV light.

2. Chemical protection: Chemical indicators in the paper appear as stains if exposed to common ink solvents.

3. Watermark paper: Watermark should not appear if scanned or photocopied.

4. Toner adhesion: A treatment applied to both sides of the cheque to maximize toner adhesion.

Protects laser-printed cheques against physical fraud by foiling attempts to remove, scrape, or modify the printed area.

5. Microprint: Tiny words on cheque should not be legible if scanned or photocopied.

6. Document fraud deterrent icon and warning box: Indicates that security features are included on cheques and outlines the implications if copying, alteration, or counterfeiting is attempted.
