# Sage 100 ERP Online

Sage 100 ERP Online (formerly Sage ERP MAS 90 Online) is a business management solution for North American companies like yours to operate efficiently and fuel your growth. Enable your team to be more productive by using a powerful suite of modules ranging from financial and accounting, business intelligence, reporting, and operations, to distribution and light assembly. Meet all your unique business needs and have security by role—down to the task level. Using the built-in dashboard and additional business intelligence tools, you and your team can use meaningful information to monitor their area of responsibility and make decisions to optimize your business. Sage 100 ERP Online gives you all the power of an on-premises secure solution with the added flexibility, convenience, and affordability of a hosted application designed specifically for regional compliance standards within North America.

Flexible Online Deployment With Power and Security

Sage 100 ERP Online—similar to software-as-a-service (SaaS) solutions—is a suite of business management software applications hosted by Sage, accessed over the Internet, and made available on a monthly pay-as-you-go subscription basis. Sage 100 ERP Online is ideal for an organization with a workforce distributed across multiple locations but still wants to centralize key functions like accounting and operations on a standardized back-office solution. Companies with remote workers, telecommuters, or mobile salespeople who are often on the road would also benefit from the portability of this on-demand solution. Sage 100 ERP Online is well suited for businesses who want to get their system up and running quickly and who prefer to make affordable monthly payments rather than making an up-front capital investment. Sage 100 ERP Online also reduces the need for an internal IT infrastructure and provides a secure, cost-effective alternative for companies currently running critical business applications on peer-to-peer desktops. And if business circumstances change, Sage 100 ERP Online customers can easily and cost-effectively transition to the on-premises version of Sage 100 Standard, Advanced, or Premium ERP (formerly Sage ERP MAS 90, 200, or 200 SQL). You are in control of your data and your system.

Optimize Your Financials, Operations and Inventory

Sage 100 ERP Online connects key functional departments for better results. Your finance, sales, and operations are able to streamline the order process to ensure your orders are delivered on time and revenue recognition conditions are met. Your purchase of goods and services can be made efficiently, cost-effectively, and securely. And because your accounting, sales, marketing, and customer service staff all have centralized access to accurate and up-to-date information, collaboration with stakeholders is automated and simplified—maximizing your bottom-line results.

Comprehensive ERP at an Affordable Price

Avoid the up-front capital expense associated with purchasing and managing a technology infrastructure. With Sage 100 ERP Online, software updates are applied seamlessly without any additional cost or disruption to you. And, you can upgrade at your convenience—unlike a SaaS alternative where upgrades are forced upon a customer by the software publisher.

Sage 100 ERP Online provides reliability with guaranteed up-times, and includes a secure back-up service for no additional cost. Get started right away with a single-year agreement or choose a multiyear for additional savings.

Sage 100 ERP Online

Harness the Power of Web Deployment

Sage 100 ERP Online provides comprehensive business management combined with the mobility of web technology to support better interoperability and collaboration. And since Sage 100 ERP Online is backed by Sage, you get the peace of mind that your ERP solution performance provides an up-time guarantee of 98 percent and includes disaster recovery in the low monthly cost. The result—secure, mobile ERP software that truly works the way you want it to—seamlessly, efficiently, intelligently, and cost-effectively, so you can efficiently operate and grow with maximum flexibility.

Flexibility to Extend Your Solution

The flexibility of the on-demand deployment model allows you to grow your company without growing your IT support burden. Easily add more users without worrying about capacity, installation, configuration, and support of additional hardware and software.

Easily Transition to On-Premises

If your business circumstances change, Sage 100 ERP Online customers can easily and cost-effectively transition to the on-premises version of Sage 100 Standard, Advanced, or Premium ERP. You are in control of your data and your system.

Extensive Support and Training

Managed by a team of certified experts in the field of application hosting— Sage 100 ERP Online is backed by experience. Rest assured, Sage will provide regular maintenance and updates for you and a fully automated backup with a disaster recovery plan to protect your investment. You receive maintenance, support, access to Sage University online training courses, and discounts on live training as part of your Sage 100 ERP Online Business Care plan. Our network of experienced North American business partners can provide you with on-site consulting, training, and implementation assistance to help you get the most out of your solution.

Top-in-Class Data Security and Up-Time Guarantee

With Sage 100 ERP Online, your mission-critical system and corporate data is hosted and managed in an extremely secure, purpose-built data center with high levels of redundancy, backup, and monitoring. This SAS 70-certified facility has fireproof cement walls, 24/7 connectivity, and human security, which provides a degree of protection and security that typical small and midsized organizations could not cost-effectively replicate.

Sage 100 ERP Online offers our customers an up-time guarantee of 98 percent with service level agreements that specify our commitment to high levels of performance, consistency, and availability. Your monthly fees include all that protection, reliability, and disaster recovery.

About Sage
